PRODUCT:	ROOFSHIELD CEMENT TILE SEALER	Code: CTS
----------	-------------------------------	-----------

**DESCRIPTION** A specifically engineered acrylic sealer for application to prepared and cleaned cement tiles as a sealing and bonding coat for the ROOFSHIELD roof coating system.

ROOFSHIELD CEMENT TILE SEALER incorporates acrylic adhesion promoting polymers which penetrate and bond with the tile surface ensuring adhesion and durability of the ROOFSHIELD coating system

ROOFSHIELD CEMENT TILE SEALER is water based and does not contain noxious solvents.

<b>PROPERTIES</b>	Gloss level	Conforms to AS 2311 - Semi Gloss
	Exterior durability	Excellent when overcoated
	Colour	Clear
	Coverage	Varies with surface (eg 4sq M/L)
	Number of Coats	1 full coat recommended
	Recoat time	2 hours in normal conditions
	Thinning	use as supplied on old grainy tiles, thin with water to aid penetration into less porous tiles. (Roofshield Cement Tile Primer recommended for most tiles. – Ref Product Data sheet)
Clean Up	Water	

**Surface Preparation**

**Refer to suggested Work Procedures for Cement Tile Roofs.**

Remove all dust, dirt, and other contaminants.

**Previously Painted Surfaces.**

Not applicable

**Application** Apply by airless spray in a single wet penetrating coat.

**OTHER INFORMATION** Stir before use.

Surface must be dry before application. Do not apply at surface temperatures below 10 degrees Celsius.
